

Do you want fuss-free skin protection & wear chic style all day long?

Bluestone Sunshields provides a safe and versatile answer

Meet Ewelina Slusarek who works with interior designers at Maxfliz in Warsaw.

Ewelina has very fair skin with freckles. She is wary about skin damage as summer's are becoming hotter all over Europe. Wearing sunglasses on a lotion laden face could cause discomfort and distraction.

The Challenge

Choosing to take an active hiking holiday, irritating sun-protectors could ruin the fun. Ewelina hoped to find an alternative to slapping on sunscreen lotion and sunglasses.

Protecting her skin was paramount to avoid sun damage and premature ageing.

The search was on for a safe, stylish alternative. Designers prioritise how something looks to be as important as how it feels...

“*My number one priority is my skin, but I really like how they look. It's important as I'm working with design.*”

Solution

A professional skincare therapist had used Bluestone Sunshields and recommended the products. This tip from someone Ewelina trusted was enough for her to research further. She then decided to snap up this unique, chic sun protection.

“I wear it 6 hours every day, it's perfect for me, everything I needed”
